In most languages, the placement test is a **C-Test**, which is a kind of cloze test designed to identify your general language proficiency:

If you would like to try out a demo version of the test in the language that you are interested in, click on the following link (requires a moodle-registration):

In **Polish, Russian and Turkish**, you will take a placement test consisting of a C-test and a multiple choice test; heritage speakers will also give an audio recording for oral placement.

In **Arabic, Chinese and Japanese**, you will also take a multiple choice test and assignment tasks. Each participant will also give an audio recording of the oral assessment.
